

SKYFLO™ Wireless Bar Control

WIRELESS SKYFLO Pour Spout

Wireless Pour spout

The best solution for cafés, pubs, discothèques, nightclubs & restaurants. It is the cheapest wireless control system.

The Powerful Pour Spout

The newly developed spout is the smallest and most powerful liquor dispenser on the market.

4 Pour Sizes

Quick and precise dispensing of 4 different pour sizes which is easily programmable through software. With a simple push of the button to change of 2cl, 3cl, 4cl, and 5cl or any other sizes.

Free Pour Option

In addition to the 4 programmable pour sizes the Skyflo Spout has a free pour mode with counting every cl/ounce poured.

Rechargeable Battery

A powerful Li-ion battery allows it to pour more than 4000 drinks without recharging.

Bartender ID and Bottle Change

A built-in bi-directional radio transceiver communicates with the Master where all bottle changing and bartender ID is registered.

Connection

- Stand-alone version with a printer
Plug Skyflo Master to a EPSON TMT88 thermal printer for direct journal report, you can compare this slip with your POS report.
- Connection to PC
Plug Skyflo Master to a PC, after data extract & compare, instruct it to print anomalies.
- Connection to POS-Debit & Credit
Debit
Automatic feeding of liquor dispensing data. As soon as the Spout dispenses, data go to POS machine instantly, no need manual registration.
Credit
The spout will not dispense until POS machine gives authorization.

Bottle presence contact

WIRELESS SKYFLO Fix

Skyflo Fix

It is the easiest way to upgrade your bar with wireless control.

Liquor Dispenser with Bartender ID
A dispenser with the build-in tiny radio transceiver identifies the bartender ID and transmits to Master with dispensing data.

WIRELESS SKYFLO Beer Monitor

Flow meter version

The best solution for cafés, pubs, discothèques, nightclubs & restaurants.

Wireless Beer Monitor

- The Skyflo Beer Monitor collects data from beer flow meters and sends it to Master via RF transmission.
- One Beer Monitor controls up to 4 beer lines.

Flow meters

- We read flow meters in a range from 1000 to 7000 impulsions/liter like SF800/EPDM and Beverage Meter 300-010 or others.
- Plug the flow meter cable to our beer monitor and installation is done in a few minutes.
- No cables, no drilling holes.

Connection

- Connection to POS-Debit Mode
Automatic feeding of draft beer dispensing data. As soon as the beer dispenses, data go to POS machine instantly, no need manual registration.

WIRELESS SKYFLO Liquor Dispenser

OVERVIEW

- Using two-way RF technology, Skyflo™ is recognized worldwide for its product, which is a simple upgrade of optic dispensers, to allow wireless liquor management.
- Skyflo™ is installed in hotels, casinos, resorts, restaurants, nightclubs and bars, cruise lines, stadium and many other types of hospitality venues.

Wireless Optic Pearl

- Easiest way to control liquor without changing the existing optics. No visual difference after changing to wireless control.
- Easy to install, just replace the Optic Pearl 's support with Skyflo™ Optic Pearl Support.
- As soon as liquor is dispensed, dispensing data is transmitted to Master with recognition of Bartender ID.
- Remove optic, system registers a new bottle change.

WIRELESS

SKYFLO Master

The Skyflo^w Master is the heart of the Skyflo family of integrated wireless products, includes: Skyflo Pour Spout, Skyflo Fix, Skyflo Beer Monitor, Skyflo Optic Pearl & SKYTAG.

The Master remains on constant alert for RF signals sent from any of our numerous wireless products --- each product used in the SkyfloTM system is especially designed to meet the varied requirements of managing, controlling, and reporting sales and inventory information.

Using Skyflo software, the Master converts and stores data, (up to 24,000 messages), on both dispensing and open stock inventory information. Problems can be rapidly identified for prompt resolution. Detailed reports are easily printed when the Master is connected to a TMT88 printer, computer or a POS system.

Skyflo TM Master Unit	Technical Specifications
Size:	5.12" (130 mm) wide 1.30" (33 mm) high 3.94" (100 mm) deep
LCD:	1.50"
Navigation button:	Reset and Menu access
Antenna:	2 pieces
Frequency:	ISM 868 MHz free frequency in Europe ISM 915 MHz free frequency in USA & Australia
Radio transmission:	150m in open air
Electrical requirement:	5 VDC @ 1A
Power consumption:	5 VA maximum
Memory:	512KB, external 256MB SD card
Serialport:	RS232/RS485
Network:	Ability to manage up to 2,000 RF devices with one Master
RTC:	Time record
Printer:	Esc/Pos, Db9
Pour times:	Programmable for different time periods
Bartender ID:	Identifies up to 128 bartenders
Interface capabilities:	- Sales Terminal (POS) with selectable protocols
